

...at home

...away

## Seeing the world?

HIV transmission can take place either at home or while you are away. Be prepared when you travel – think about the situations you may find yourself in. Pack condoms and lube – they aren't available everywhere. For more information for gay men who are travelling, check out the free booklet from your local AIDS council or visit [www.afao.org.au](http://www.afao.org.au).
